

Ground Safety Committee:

The committee came up with proposals to the District as follows: Number 1 - suggest they appoint a functioning Ground Safety Committee with members from each work group and/or employer. Number 2 – promote the development and/or establishment of active Ground Safety Committees at each local lodge and provide the assistance the locals might need. Number 3 – conduct ground safety conferences annually. Number 4 – report back in 2011 the progress of this convention.
