Contract Language Update

The Association negotiating team met this week with the company in Dallas, TX to continue finalizing contract language to bring our Agreements in Principle (AIPs) back to the membership as complete Tentative Agreements for your consideration.

Making sure the contract language is accurate for this historic ratification vote by our members is a critical step in the process, but this phase is moving closer to a conclusion. The negotiating team is meeting with the company again next week with the intent on finalizing all language.

When all language is finalized, complete text of all agreements will be posted on the Association website, followed shortly thereafter by copies being mailed to all members.

We appreciate your patience as we complete this tedious work in finalizing the T/A language. As always, Association representatives are on the shop floor ready to answer any questions or provide clarification about the AIPs.
